

# The World's Smallest Table printer for Waterproof Colour Print

We have the pleasure to introduce the world's smallest table printer CX86e for waterproof print of labels in colour:

- ✓ From roll so you can print as little as 1-2 labels
- ✓ In durable colour print for usage both in- and outdoor
- ✓ On our proven loop, selfadhesive and pot labels
- ✓ Cut in the printer ready to use
- ✓ And where a new set of toners is extremely cheap!

The printer is easy to use with existing label software from your local Floralabels partner - or you can use the free CX86e Quickstart Software. Robust Japanese OKI quality finalised in Germany secures a reliable printer with high print quality.

We have made both loop, pot and selfadhesive labels in roll available from stock.

Other sizes and types available on demand.
